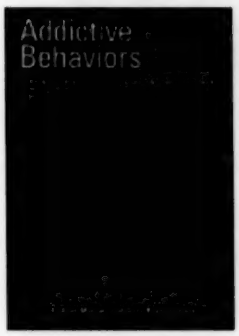
Addictive Behaviors

Readings on Etiology, Prevention, and Treatment

Editors: G. Alan Marlatt and Gary R. VandenBos

The destructive power of addictions can be seen in ill health effects, social and family problems, and economic and legal troubles. It is not surprising that the study of addictive behaviors in psychology has grown quickly in the 1990s.



Psychologists' roles within this arena include researching the effects of drug action, studying the epidemiology and etiology of drug and alcohol abuse, developing and evaluating prevention and treatment programs, and studying the effects of drug policies on human behavior.

This extensive collection of reprinted journal articles from the American Psychological Association journals provides a current view of psychological research on addictive behaviors. 930 pages. 1997.

Contents Include:

Basic Findings from the National Comorbidity Survey • Alcoholism: A Developmental Disorder • Resistance-Skills Training and Onset of Alcohol Use • Prediction of Controlled Drinking by Alcoholics and Problem Drinkers • Screening for Neuropsychological Impairment in Alcoholics • Stages of Change Readiness and Treatment Eagerness Scale (SOCRATES) • Alcohol and Aggression: A Meta-Analysis • Relapse Prevention as Psychosocial Treatment • Vocational Rehabilitation of Drug Abusers • Using Research to Guide Culturally Appropriate Drug Abuse Prevention • **Plus 23 More Chapters!**

TRUSTED WORLDWIDE AS THE AUTHORITATIVE PRINTED REFERENCE IN PSYCHOLOGY

Now a single print product gives users access to chapter, book, and journal information from all areas of psychology and related disciplines. APA's *Psychological Abstracts (PA)* brings users nearly 3,000 journal abstracts every month and NOW includes book chapter and book information.* Both psychologists and librarians have reported that they want the convenience of having a single source for ALL of the information available from books, book chapters, and journals. That's why chapter and book summaries are included in the monthly issues of *PA*.**

PA gives your users an overview of research in psychology and related fields, sums up articles from over 1,300 English-language journals and over 1,500 books annually, shows everything that's new in a given specialty, and much more!

Don't miss out on psychology's richest resource on current literature! *PA* is priced at $1,359 per year for institutions. Well worth it for over 4,000 journal *and* book abstracts per month!

For more information, write to:

This Annual Subject Index, published in five volumes, consolidates more than 159,000 references to approximately 45,000 abstract records published in 12 monthly issues of *Psychological Abstracts* from January 1997 through December 1997. A companion work, the Annual Author Index, references these records by author and document title.

Index terms, selected from the *Thesaurus of Psychological Index Terms*, represent the literature covered for the periods indicated. Only terms assigned as major terms, reflecting the main focus of the article, appear in the printed subject index. (Terms assigned as minor do not appear in print but are available for online searching.) Subject matter content determines the specific terms used and, thus, not every thesaurus term will appear in every index. "See" and "See Also" references are present to direct the user to the preferred terminology or related areas of interest. Index phrases are alphabetically arranged under the appropriate index terms and represent a concise statement of the article's content or, when appropriate, identify the independent and dependent variables described in the material as well as the subject population. Style changes such as the increased use of abbreviations or the elimination of some hyphens may result in some inconsistencies and may affect the alphabetical order of phrases.
